

Reminder: AI is an analysis and coordination tool. All operational decisions require verification and authority.

AI Prompt Sheet: Mega Event Leadership Teams

Events With 251,000+ Attendees

Copy. Paste. Reuse.

1. Enterprise Readiness and Systems Risk

We are managing a special event with ____ attendees over ____ days. Ask structured questions about governance, command structure, coordination, vendors, utilities, transportation, safety, communications, and external agencies. Identify system-level risks.

2. Crowd Flow and Infrastructure Load

Analyze our site layout and infrastructure. Evaluate crowd flow, queuing pressure, ingress and egress, utilities load, redundancy, and emergency access.

3. Command, Authority, and Escalation

Review our command structure and escalation paths. Identify where delays, confusion, or authority gaps are likely.

4. High-Impact Scenario Stress Test

Stress-test plans for severe weather, infrastructure failure, medical surges, security incidents, transportation breakdowns, and public communications crises.

5. Executive After-Action Review

Conduct an executive after-action review for ____ attendees. Ask department-level questions and summarize strategic lessons and priorities.
